Database: Artemis Literary Sources

Reviewed by M.A., Journalism major and Communications minor, Sophomore on 09/21/16

Why do I like Artemis Literary Sources?

I like Artemis Library Sources because it gave me more information about the famous English philosopher, Thomas Hobbes, who I first learned about in high school and just had a question about him on my English quiz earlier today. The quiz was solely focused on Renaissance writers and philosophers, including Hobbes. It’s full of so much more literary information throughout history, not just the Renaissance era. If I need to know more about Shakespeare, Robert Frost, etc., this is the website to go to because it covers literature over a long timespan.

How have I used Artemis Literary Sources?

I will continue to use this database for my English class because I actually have to write a paper (due in late November) about modernism and relate it to artwork from the Neue Galerie. My professor said that modernism won’t be covered in class just yet, but we can research it on our own in order to work on the paper. Now I know how I’ll be conducting my research!

How can I use Artemis Literary Sources?

Just like database #1, all I have to do is search any word(s) in the search bar on the upper right side, and I will find whatever it is that I’m looking for that is related to literature. I never had a textbook for English, but this is especially influential to my current class because we have to know information
about both the time period and the people who were alive during the time. Artemis Literary Sources is a easy to use literary search engine that I’ll be sure to keep using.
